*HMC FLEX-najlepiej dopracowany elastyczny system dekoracji
budynków w Europie*

OPIEKA I GWARANCJA

- najlepiej dopracowany Elastyczny System dekoracji budynków w Europie
- profesjonalna obsługa oraz doradztwo
- bieżące informacje o przebiegu transakcji i opieka posprzedażowa
- pięcioletnia gwarancja producenta w Systemie Linton na powlekane profile
- kilkudziesięcioletnia trwałość naszych produktów

OCHRONA ŚRODOWISKA

nasze produkty są naturalne dla
środowiska

ZALETY SZTUKATERII ORO DECOR:

system powlekania HYBRID FLEX

łatwy montaż

odporność na warunki atmosferyczne

łatwe do malowania

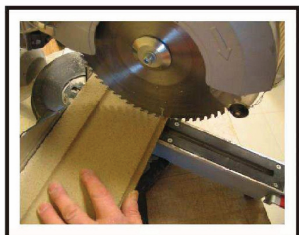

wytrzymałe i elastyczne

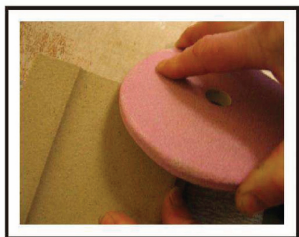

niepalne

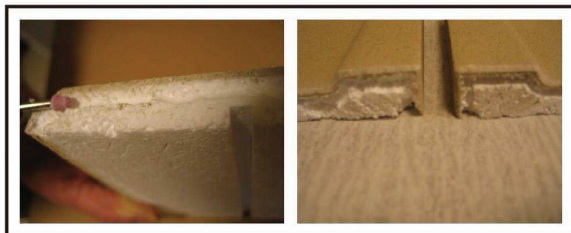

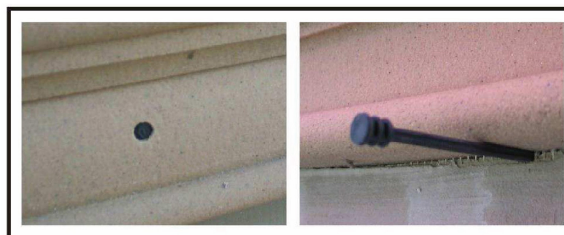

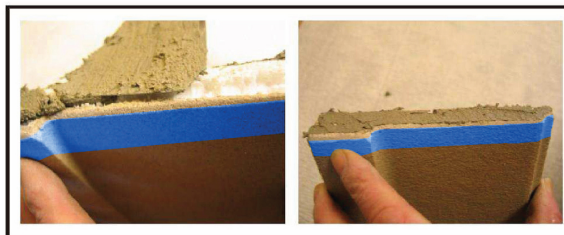

Instrukcja montażu sztukaterii ORO DECOR

1. Profile sztukaterii profesjonalnej ORO DECOR przycinamy przy pomocy piły mechanicznej.

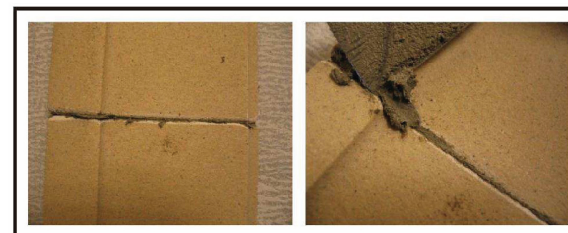

2. Krawędzie profili fazujemy.

3. Powierzchnie przylegające profil do profilu frezujemy, w warstwie styropianowej pod powłoką frezujemy rowek na głębokość ok 5mm i całej długości rozwinięcia.

4. Do przyklejania profili fasadowych używamy kleju dwuskładnikowego-Aron CD. **Uwaga!!! Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze** oraz zakresy wymaganych parametrów otoczenia w miejscu wykonywanego montażu.

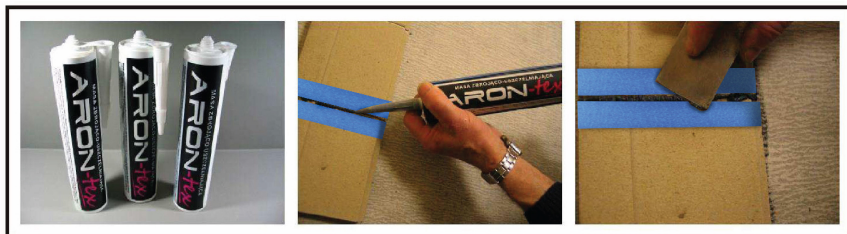

7. Profile przyklejamy do podłoża. Nadmiar kleju usuwamy. Czekamy do całkowitego wyschnięcia kleju.

5. Przed położeniem kleju - przy krawędziach naklejamy taśmę papierową w celu zabezpieczenia powierzchni przed nadmiarem kleju. Powierzchnie styropianowe pokrywamy w całości klejem Aron CD. **Uwaga!!! Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze oraz zakresy wymaganych parametrów otoczenia w miejscu wykonywanego montażu.**

6. W przypadku profili o dużych gabarytach stosujemy prostą listwę startową z podparciem. Dopuszczalne jest jak na Foto - kołki mocujące lub pojedyncze podparcie.

Instrukcja montażu sztukaterii ORO DECOR

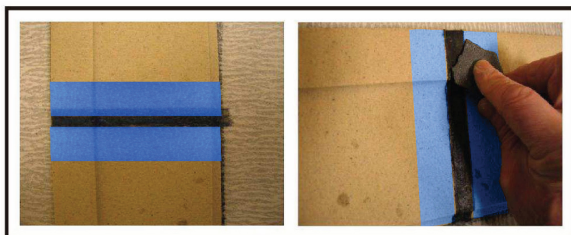

8. Powstałe szczeliny na łączeniach wypełniamy masą zbrojąco-uszczelniającą Aron Tex.

Uwaga!!! Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze oraz zakresy wymaganych parametrów otoczenia w miejscu wykonywanego montażu.

9. Miejsca styków profili ze ścianą wypełniamy masą zbrojąco-uszczelniającą Aron Tex.

10. Wysuszone miejsca szpachlowania łączeń szlifujemy.

11. Powstałe szczeliny na łączeniach wypełniamy masą zbrojąco-uszczelniającą Aron Tex.

Uwaga!!! Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze oraz zakresy wymaganych parametrów otoczenia w miejscu wykonywanego montażu.

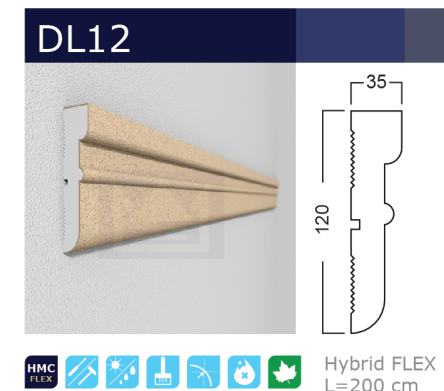

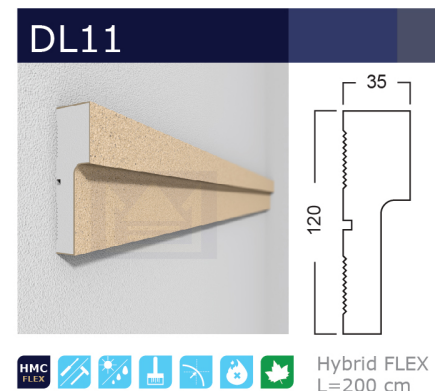

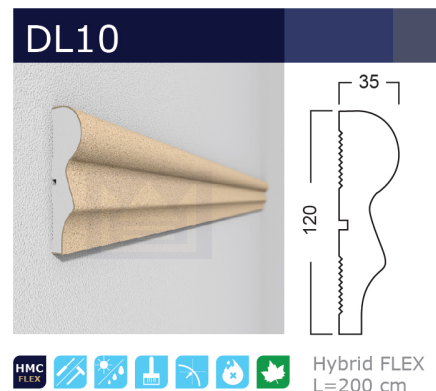

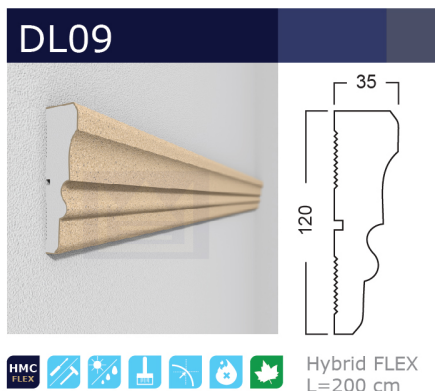

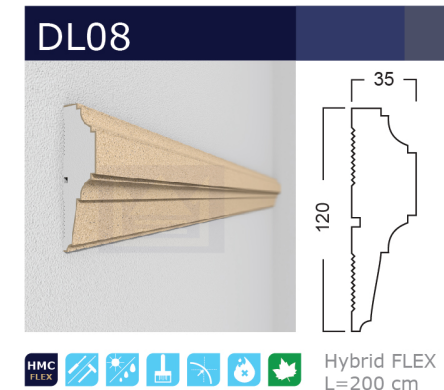

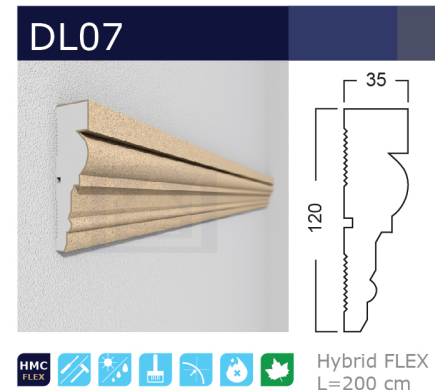

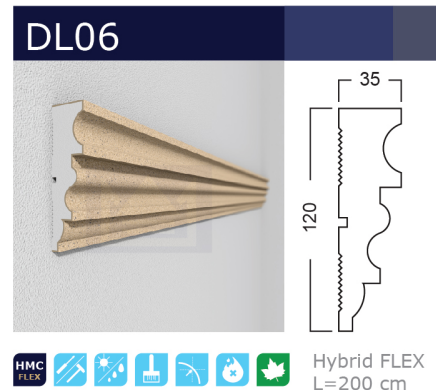

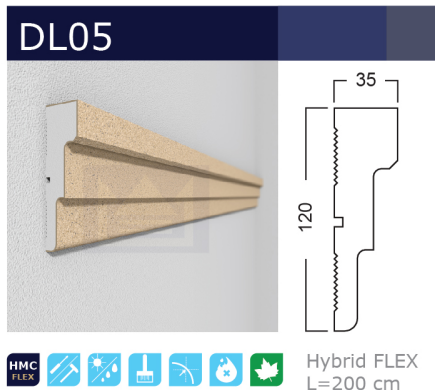

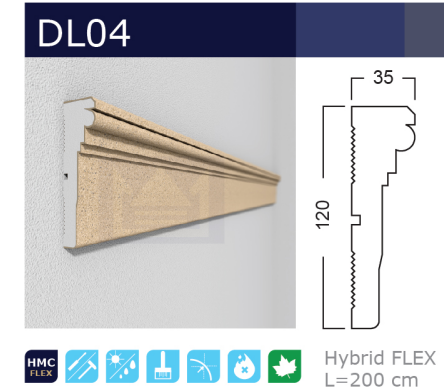

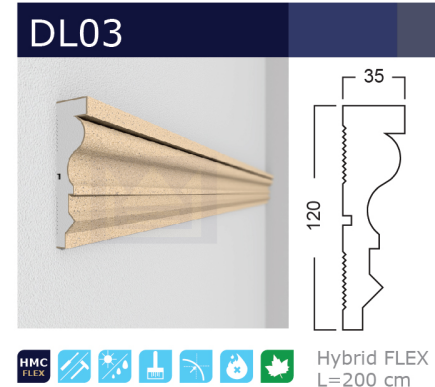

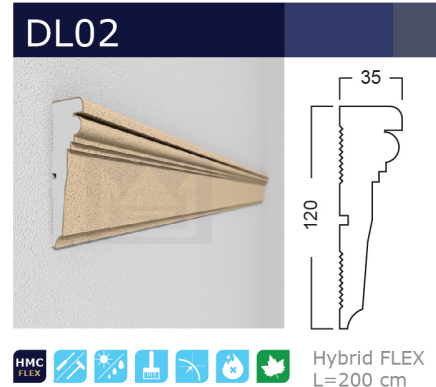

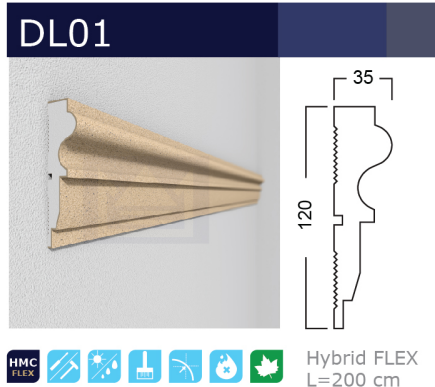

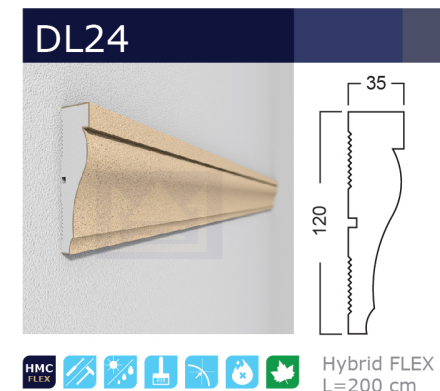

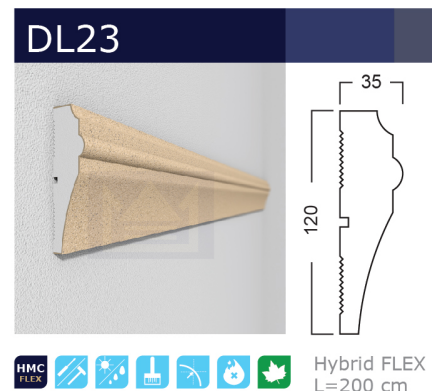

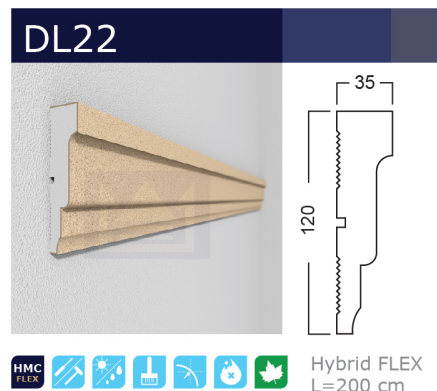

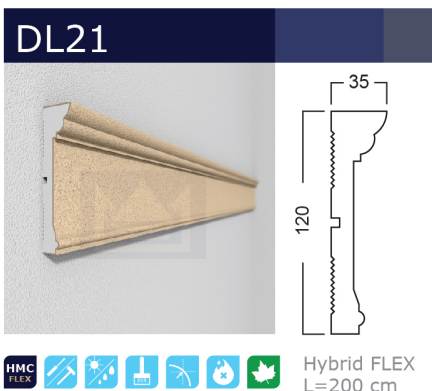

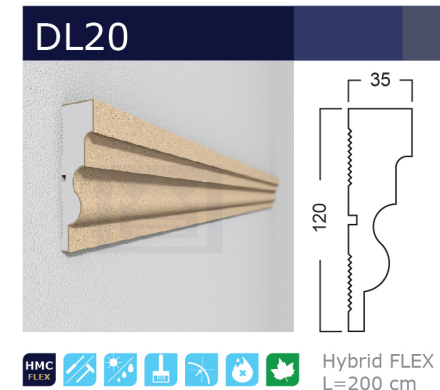

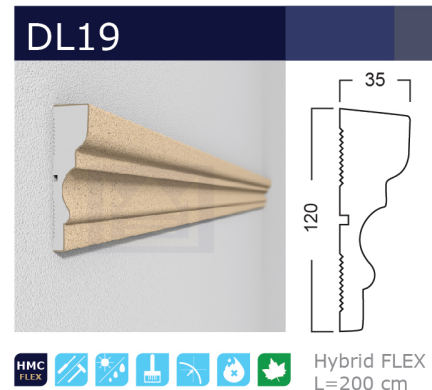

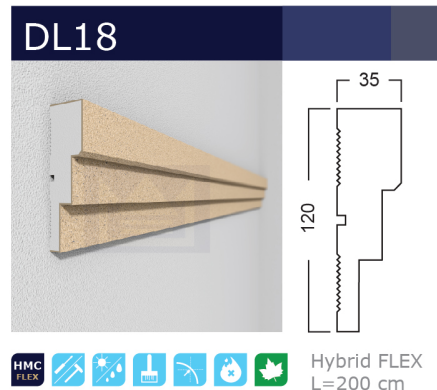

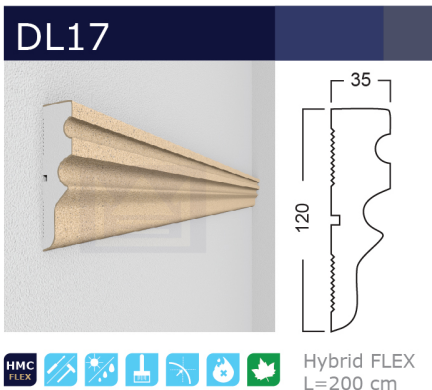

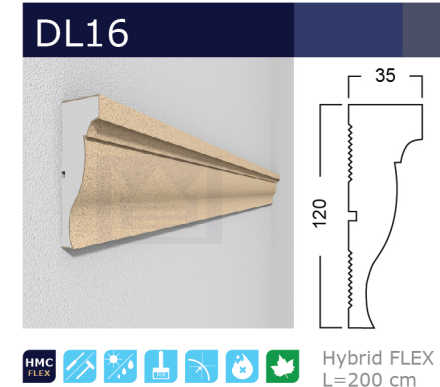

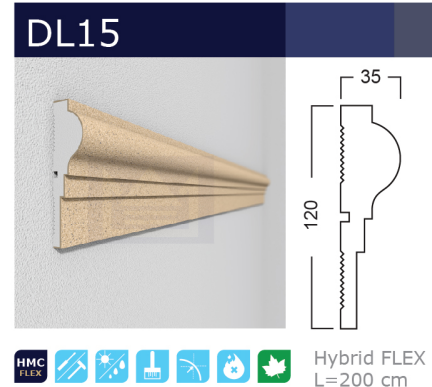

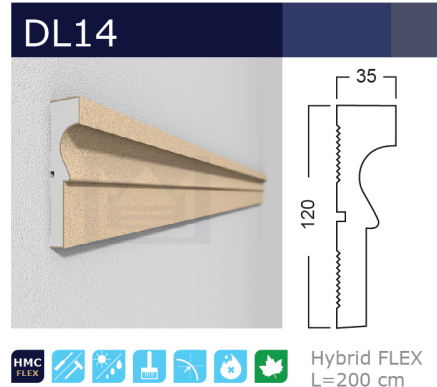

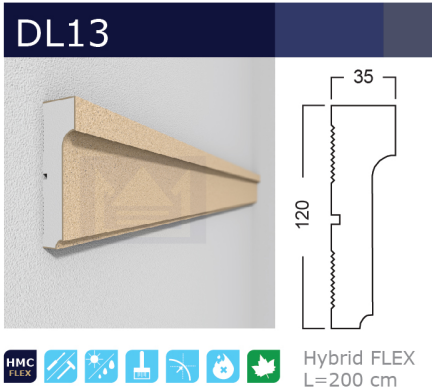

12. Całość przygotowanych listew pokrywamy żelom strukturalnym Aron Gel. Aby uzyskać pełną strukturę nakładamy dwie warstwy mokre na suche. **Uwaga!!!** Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze oraz zakresy wymaganych

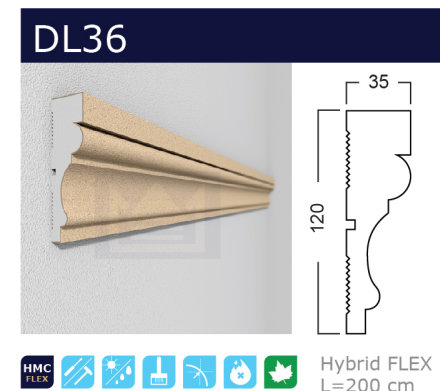

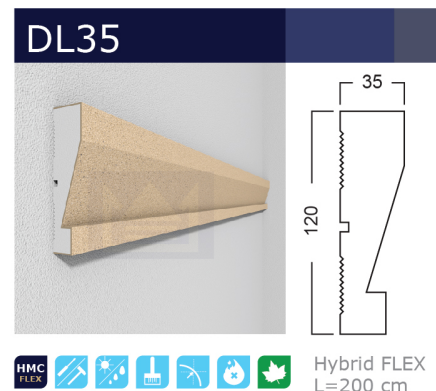

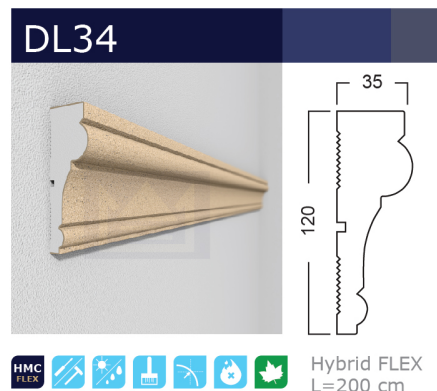

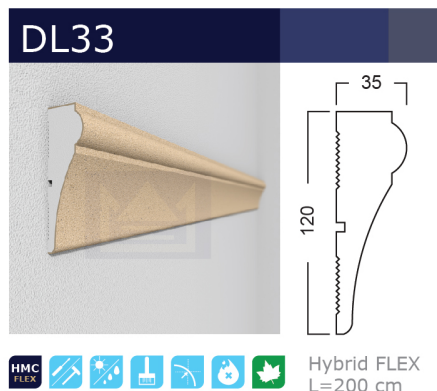

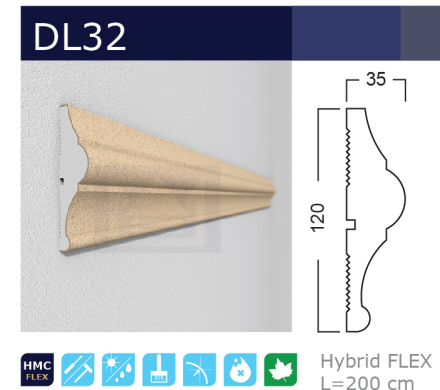

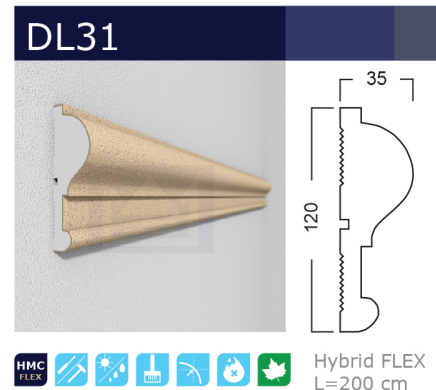

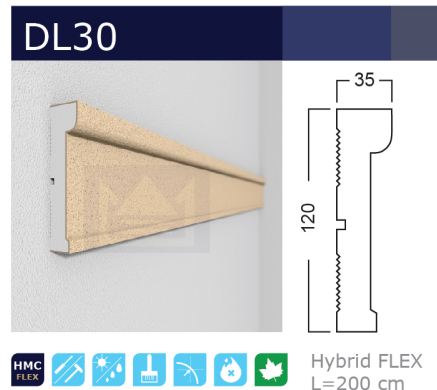

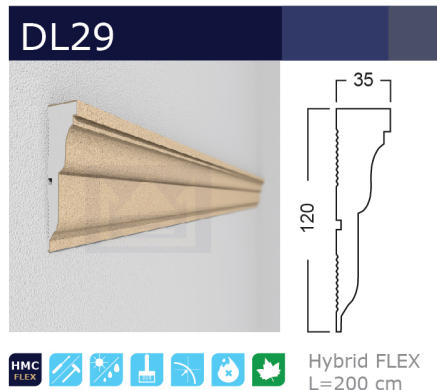

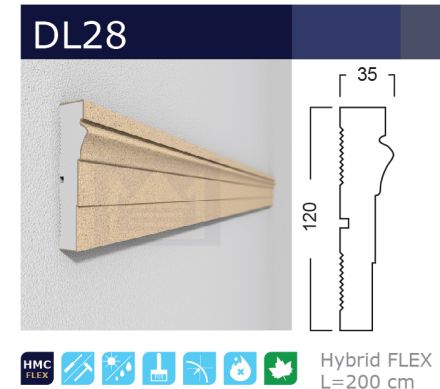

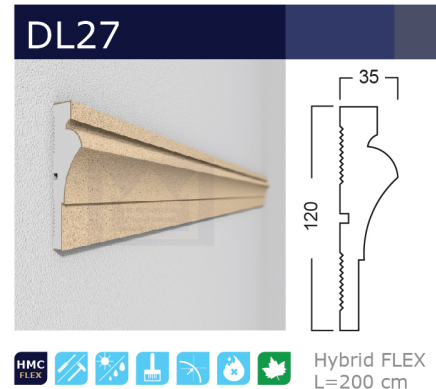

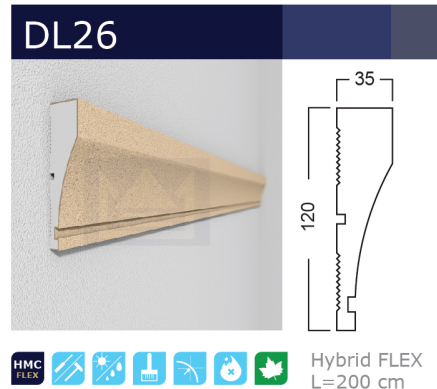

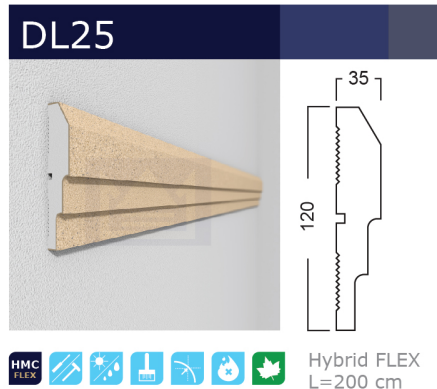

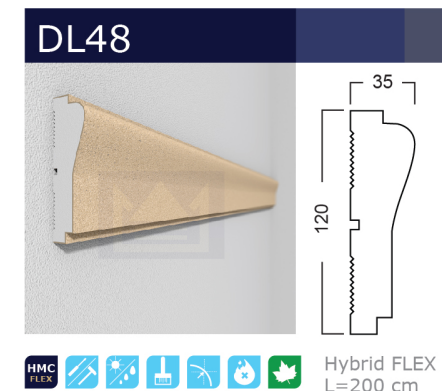

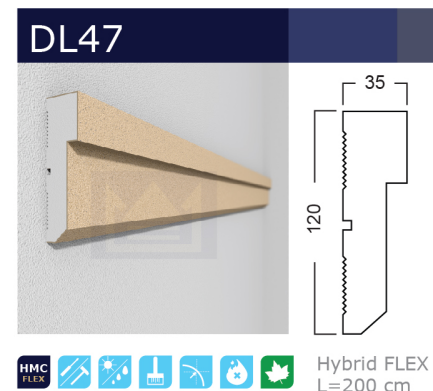

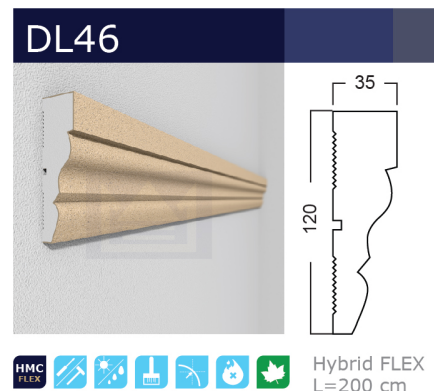

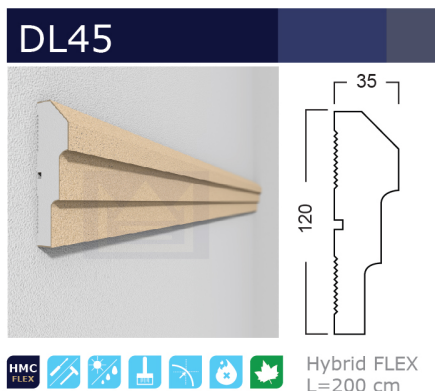

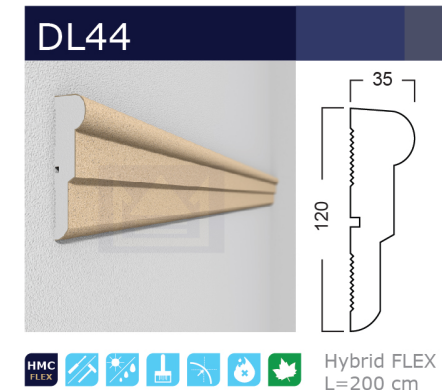

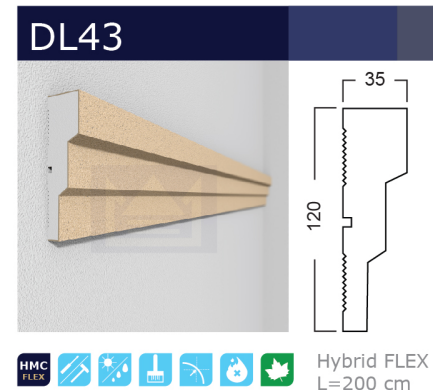

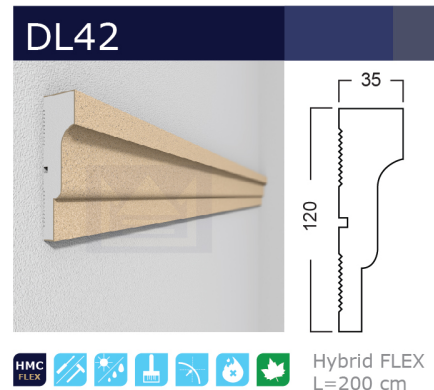

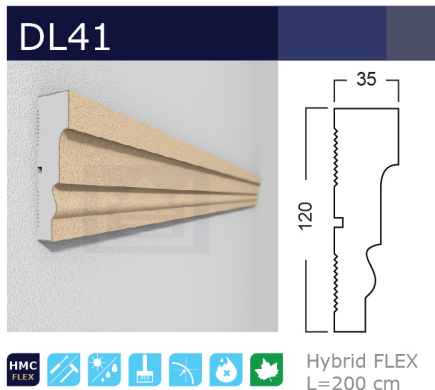

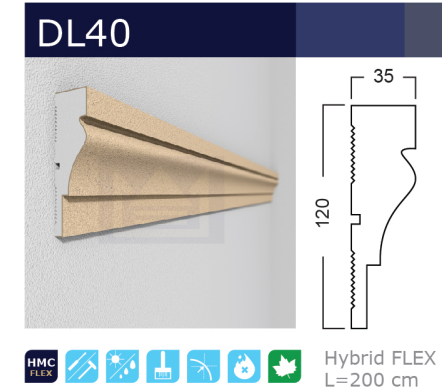

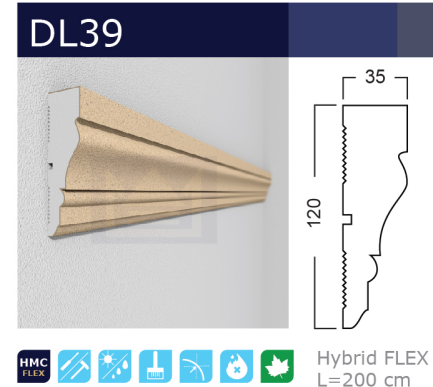

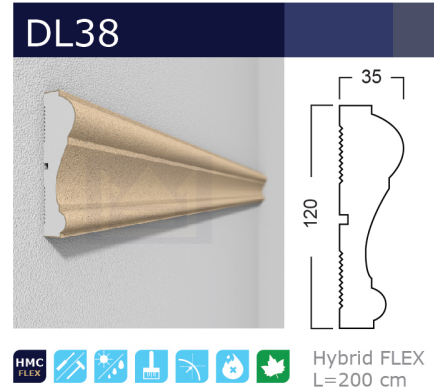

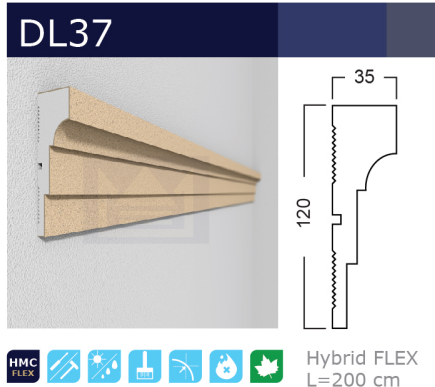

13. Listwy malujemy elastyczną farbą Lusso. **Uwaga!!!** Sprawdzić w kartach technologicznych stosowanego produktu czynności przygotowawcze oraz zakresy wymaganych parametrów otoczenia w miejscu wykonywanego montażu.

Listwy do Boniowania

The image shows a modernist cornice installed on a light-colored, textured building facade. A circular callout on the left provides a magnified view of the cornice's profile, which features a clean, stepped design. The background image includes a window with a white frame and a dark sill.
